

FIELD ID: A FAST, POWERFUL, AND RELIABLE ASSET INSPECTION SOLUTION

There are
340 million
occupational
accidents related
to work, annually. ¹

OVERVIEW

Alcumus Field ID is a powerful, cloud-based mobile solution that helps with safety asset inspections across multiple locations on the device that best suits your needs. With this tool, you can manage equipment quickly and efficiently while protecting what is most valuable: your people.

Having the ability to effectively protect against equipment failure and malfunction is essential to reduce workplace injuries and ensure business continuity. Without a modern and easy to use digital solution in place, it can be challenging to proactively maintain equipment safety to mitigate risks on-site. Risk arises from the inability to audit or trace equipment inspections easily across multiple locations, difficulty keeping up with compliance inspection schedules, as well as a lack of visibility into asset inspection history, records, or user accountability.

Continuing to use outdated inspections tools or paper-based systems which are not user-friendly, lack mobile capabilities including RFID and barcode scanning, and the inability to work offline, can make inspecting assets difficult, if not ineffective. Relying on a paper-based system also negates the opportunity to gain timely insight into your compliance status and drive accountability among workers.

SOLVING YOUR SAFETY CHALLENGES

Having a robust digital asset inspection solution to manage and maintain all safety equipment can:

- Improve productivity and profitability with fast and effective assessments
- Use automation to simplify inspection processes and set up streamlined workflows to conduct asset inspections efficiently and execute corrective actions quickly.
- Centralize all documents and data in one place, providing access to your inspection history with a mobile-first approach to enable users to work from any location.
- Create a proactive set of rules across all sites so all processes and activities are aligned.
- Establish data-driven safety strategies to help ensure compliance, pinpoint gaps, and make fact-based decisions to mitigate risks.

FIELD ID: A FAST, POWERFUL, AND RELIABLE ASSET INSPECTION SOLUTION

KEY PLAYERS

VP of Operations

Needs to ensure asset inspection and safety best practices are in place to reduce liability.

Safety Director

Requires real-time data to assess the performance of the safety program, asset status and compliance.

Inspector/Auditor

Needs an easy-to-use mobile app to perform scheduled asset inspections on a regular basis.

THE POWER OF FIELD ID

Increasing efficiency and streamlining safety processes through simple, user-friendly configuration options, this asset inspection solution provides an unparalleled experience when transitioning between online and offline modes.

Alcumus Field iD will make Environmental Health and Safety (EHS) operational excellence attainable in as quick as 30 days, by allowing you to easily conduct inspections at volume, maintain compliance, and access data for each location in just a few clicks.

The most common use cases include:

- **Asset Inspection and Safety Compliance Management:** Conduct asset inspections and audits on the web or your mobile device by quickly tracking and identifying equipment with high-frequency RFID or barcodes to boost operational efficiency.
- **Reporting and Analytics:** Proactively understand the safety history and status of assets, any corrective actions, and upcoming scheduled inspections, to stay ahead of failure.
- **Action Item Tracking:** Stay up to date, and never miss a task with action items to mitigate risks quickly and prolong equipment life.

FIELD ID: A FAST, POWERFUL, AND RELIABLE ASSET INSPECTION SOLUTION

After Alcumus Field iD, we have been able to (with the mobile app) incorporate every single engine move across all our out-stations and that information is immediately accessible to every Delta manager across the world...It has made the workplace safer.

KEY BENEFITS

This asset inspection solution will help streamline day to day operational processes, making it easier to inspect assets, assign corrective actions, and make data-driven decisions based on reporting and analytics. With this digital tool to help proactively maintain equipment safety, you can create a safer work environment.

Field iD can help you:

- **Increase efficiency:** Complete inspections and audits faster, more accurately, and without duplicate data entry.
- **Reduce liability:** Ensure work is done on time by streamlining your safety processes with the ability to automatically schedule events, inspect assets, and more with the click of a button, reducing the chance of an incident.
- **Maintain compliance:** Stay compliant with our Safety Dashboard, ensuring complete clarity and oversight into your compliance requirements.
- **Increase visibility and transparency:** View the safety status of your organization's assets with our powerful reporting functionality.
- **Strengthen your safety culture:** Connect workers and empower them with a user-friendly tool, allowing them to play a valuable role in maintaining a safe working environment.

WHAT MAKES US DIFFERENT

Field iD is a unique asset inspection solution as it contains a breadth of functionality, designed to help you stay proactive. Seamlessly reduce risks and increase efficiency with the following key elements:

Inspections template and customize forms: Choose from a range of ready-made inspection templates or easily create your own.

Lockout/tagout management: Use Alcumus Field iD to easily author and revise lockout procedures, record lockout procedure activity, and more.

Corrective action assignment: Explore the Dynamic "My Work" functionality which allows you to view all the work assigned to you on one platform.

Centralize information: A single source to store inspection history, asset details, and reporting to leverage in multiple ways, whether on a job site or at your desk.

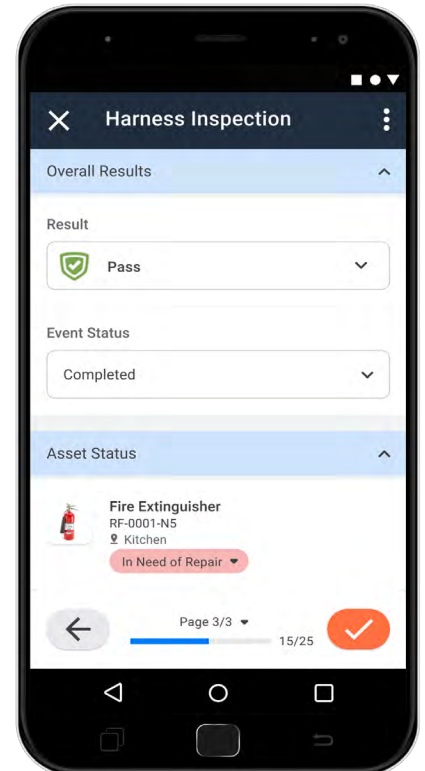

Reporting & analytics: Gain visibility into asset status and safety history, inspection results, corrective actions and upcoming scheduled inspections.

Offline or online capabilities: Information can be stored and accessed whether you're on or offline, with Alcumus Field iD's reliable offline mode.

RFID and barcodes: Quickly track and identify your equipment with high-frequency barcodes and RFID*.

Scheduling: Never miss a critical inspection or audit by scheduling in advance with efficient scheduling and notification options.

Email notifications: Receive email notifications on upcoming or overdue work, and avoid falling behind.
