SAFETY INTELLIGENCE:
THE FUTURE OF SAFETY REPORTING

OVERVIEW

Safety Intelligence is a robust reporting engine revolutionizing the way organizations leverage safety data. Found within the Alcumus eCompliance solution, think of Safety Intelligence as your compass guiding you in the right direction to drive safety performance and achieve your goal of zero incidents at the workplace.

One of the most fundamental elements of any safety manager's job is the ability to aggregate and analyze key safety metrics. Without this insight, it's difficult to assess your safety program and take the necessary steps to improve. This includes tracking safety KPIs, measuring performance, deriving actionable insights, and implementing changes, which is simplified with this dynamic functionality.

Your solution to real-time information and insight into your safety program to make quick, data-driven decisions starts with Safety Intelligence.

SOLVING YOUR SAFETY CHALLENGES

Safety Intelligence provides safety managers and directors with actionable and insightful data, essential to manage and enhance an organization's safety program. It will help you:

- Understand the adoption of a safety program and drive accountability, by gaining a bird's eye view into participation and engagement rates to help direct efforts to increase adoption.

- Track key safety KPIs, trends, leading and lagging indicators, and more, to assess, build and enhance safety program performance.

- Attain near real-time access to a 360-view of your safety program and performance, by providing a deep dive into specific elements to uncover actionable insights aligned to your environment.

- Make management reporting simple and easy, by giving you the option to schedule dashboard views to be sent straight to your inbox on a weekly, monthly, or daily basis.

- Share data with safety leaders, site supervisors, and your peers providing clarity across the organization and driving safety program adoption.

> "
> Safety Intelligence has helped us save the time of running reports making our processes more efficient, with its simple and user-friendly functionality. Managers can easily set up their own dashboards allowing them to drill into specifics for each site, providing access to real-time data available as soon as you log in. A visually attractive and well organized user experience.

SAFETY INTELLIGENCE:
THE FUTURE OF SAFETY REPORTING

KEY PLAYERS

Safety Manager
Needs visibility of the key safety metrics and overall safety program across the organization

Business Analyst
Requires real-time data to assess the performance of the safety program

System Administrator
Simplifies end-user adoption through easily configured, pre-built dashboards

THE POWER OF SAFETY INTELLIGENCE DASHBOARDS

With this user-friendly and robust reporting engine, attaining safety excellence is made easy. With the data obtained, you can pinpoint gaps in your safety program and focus on areas you need to strengthen at a glance, through a simple and visually appealing user experience.

Safety Intelligence provides an ever-increasing library of over 20+ dashboards, pre-built to support the most common use cases.

The Standard Incident Classification dashboard provides a view of the incidents and injuries reported at your organization, as well as dates, classification, and more, with metrics that communicate the maturity of your safety program.

For example:

- **Training Compliance Report**
  Stay on top of all employee training and compliance with this report which provides a snapshot of all employees, what training they have, what's expiring soon, who is compliant, and who is not.

- **Leading Indicators Report**
  Report on top hazards, by site, job profile, team, etc. with a structured and scheduled plan, to give your team direction on weaknesses within your safety program.

- **Lagging Indicators**
  Understand past incident data to uncover opportunities to enhance your front-line safety with insight into lagging indicators.

- **Safety Program Adoption**
  Track the adoption of your safety program by gaining access to the number of forms submitted by site, team, or individuals with a few simple clicks.

SAFETY INTELLIGENCE:
THE FUTURE OF SAFETY REPORTING

KEY BENEFITS

In short, this business intelligence tool simplifies reporting with automatically generated reports, provides safety managers with key metrics to assess their safety performance, and provides a foundation for advanced data analysis to define trends and stop incidents before they occur.

With Safety Intelligence in the palm of your hands, you can:

- **Gain complete visibility into your safety program adoption and performance**, with quick and easy access to your safety KPIs and dashboards.

- **Make management reporting simple** with executive ready dashboards with all key insights.

- **Enhance your safety program and take the necessary steps to reduce incidents on the frontlines**, by automating your dashboards to be sent by email to site-managers with actionable insights from your safety data.

- **Obtain a quick overview of compliance adherence** across various areas of your safety program.

- **Assess your company's safety performance**, by quickly locating data via customized dashboards.

- **Analyze safety information** to make data-driven decisions.

- **Explore the relationship between various data sets** to see if there is a correlation among different operations.

- **Close the feedback loop** and keep your team informed on company performance.

SAFETY INTELLIGENCE:
THE FUTURE OF SAFETY REPORTING

WHAT MAKES US DIFFERENT

How is Safety Intelligence unique? This robust reporting engine is unlike any other as it offers the core features and capabilities required, with an easy to configure and easy to personalize user experience.

Access Dashboards
Gain access to common dashboards which solve for most common reports used by safety administrators.

Filter and Save Dashboards
Use various filters to slice and dice data and save common dashboards for quick access, to provide an overview of specific data required by the user.

Schedule Dashboards
Receive requested safety reports on a scheduled basis and share them with your team. With Safety Intelligence, you can schedule Management KPIs for executives on a quarterly or monthly basis, and schedule Operation Reports for site supervisors on a weekly or daily basis.

Download Dashboards
Download safety data into multiple formats:

- **Drop PDF versions of your dashboard into your presentation**

- **Export data from the reports in csv/excel for further offline analysis, to help you connect to a broader business intelligence framework.**

Favorite Dashboards
Set your favorite dashboards for easy access.

Organize Dashboards
Stay organized with the ability to create folders and arrange dashboards for quick and easy access.
