

# ECOMPLIANCE: SIMPLIFY YOUR OCCUPATIONAL HEALTH & SAFETY

Alcumus eCompliance has proven to be far more user-friendly for the less technologically-savvy employees than trying to use and manage email, computers, printers, scanners, and internal webpages. With Alcumus eCompliance, our supervisors are able to log in, fill out paperwork quickly within the system, and then receive it at our office right away for review. So much of what was once done manually is now done automatically.

## OVERVIEW

Alcumus eCompliance is a mobile, cloud-based health and safety management solution that helps businesses mitigate risks quickly and maintain a proactive safety approach. Unlike paper-based systems and poorly designed legacy safety tools, eCompliance makes it easier to meet regulatory compliance, reduce incident rates and prevent lost time from injuries.

To effectively keep the workforce safe, businesses must identify and mitigate risks and hazards on-site quickly. This can be challenging with limited resources, where safety teams struggle with administrative tasks and are overwhelmed by multiple responsibilities. This makes it difficult to scale across sites and improve safety KPIs from a focus on lagging indicators to leading indicators.

Gaining complete visibility into safety performance to quickly spot trends and gaps is critical for any safety team. The longer these risks take to identify, the more potential for injury and illness on-site.

## SOLVING YOUR SAFETY CHALLENGES

With a health & safety management solution that can grow alongside your organization, Alcumus eCompliance can help address:

- Slow communication of corrective actions and driving accountability at job sites.
- Reducing time-consuming error-prone manual safety processes.
- Lack of visibility around hazards, risks, and root causes makes improving safety procedures even harder.
- An inability to deliver, manage and track employee training and recertification.

\$4-6 dollar return on every \$1 spent on safety and injury prevention<sup>1</sup>

60% reduction of injury rates seen over 24 months of solution implementation<sup>2</sup>

90% of customers have improved their safety record by implementing Alcumus eCompliance<sup>2</sup>

## KEY PLAYERS

### Business Executives

Boost your bottom line and return on investment with safety as a competitive advantage to gain complete visibility into the organization and attract more business.

### Safety Leaders

Save time and drive safety performance with complete transparency into the safety program and 360-degree reporting in real-time for faster, fact-based decisions.

### Front-line Workforce

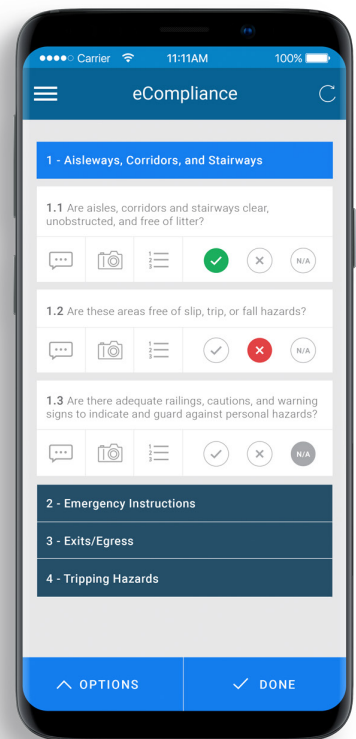

Simplify day-to-day processes with a mobile system that's easy to use and gives the workforce a voice.

## YOUR SAFETY NEEDS SIMPLIFIED

Alcumus eCompliance provides the ability to digitize inspections and audits, track training competencies, implement preventative measures, gain a 360-degree view into your safety performance, and more.

We support all of the most common use cases, which include:

- **Creating Scheduled or Ad Hoc Inspections, Audits and Checklists:** Create an accountable trail for any inspection or external audit, tracing back to the user to ensure integrity and adherence to standards.
- **Assigning Corrective and Preventive Actions:** Assign corrective and preventive actions with automated notifications based on priority ranking and deadlines.
- **Incident Management:** Reduce incident and injury rates by giving your workforce the ability to instantly report all risks and hazards through a mobile application, notifying safety leaders to act quickly.
- **Tracking Forms & Worker Certification:** Use robust reporting capabilities to track the status of form completion and worker certifications.
- **Policies & Procedures Acknowledgment:** Give your entire organization access to your workplace policies and procedures or formal Job Hazard Analysis. Request confirmation that employees have read the materials with reports that allow management to see who has/hasn't read them.

## KEY BENEFITS

This digital solution will help simplify safety, allowing business leaders and safety leaders to properly gauge safety performance with complete transparency into their safety programs.

With eCompliance at your fingertips, you can:

- **Reduce Administrative Constraints:** Spend less time entering data and more time out in the field.
- **Improve Safety Performance:** Move from reactive to proactive safety management procedures.
- **Boost Worker Participation:** Make safety participation easy for all front-line workers, no matter where they are.
- **Prevent High Insurance Costs:** Lower incident rates to prevent higher insurance costs.
- **Maintain Compliance:** Mitigate hefty fines and possible damage to brand reputation.

## WHAT MAKES US DIFFERENT

Alcumus eCompliance has helped eliminate over 1 million workplace incidents in organizations across North America.

We help business leaders and safety professionals make the workplace safer through these key elements:

**Reporting and Dashboards:** Track metrics like leading and lagging indicators, Total Recordable Injury Frequency (TRIF), Days Away Restricted or Transferred (DART), Lost Time Injury Frequency Rates (LTIFR), and more with the help of Safety Intelligence's robust reporting capabilities.

**Hazard Identification and Assessments:** Identify and report hazards easily with the ability to assign tasks on the spot, take photos, and customize your hazard assessments, online or offline.

**Audits and Inspections:** Streamline your inspection processes with the ability to create action items and monitor all completion statuses to drive worker participation.

**Corrective Action Notification Set Up:** Set up automated notifications and alerts to notify key players of corrective actions and their status of completion for greater accountability.

**Training Management:** Assign, track, and manage all training and certifications easily. We offer over 200 eLearning courses in English, French, and Spanish.
